

Dear Team,

Hope you all are well.

I wanted to say a **HUGE THANK YOU** for being a part of my winning team. Cummins finally launched Power Hub yesterday and I am truly grateful to each and every one for playing an integral part of this magnificent facility.

Please may I ask for your patience and commitment to assist me with closing out the loose ends.

I look forward to working with you on future project.

Kind Regards,

Chevy

Dear JHB Program PMs

At this stage it might still feel a bit surreal and a bit of an anti-climax but it is true, your blood sweat, frustrations, and determination has actually turned into the delivery of an impressive facility in the fastest growing suburb in Africa.

I do not have to say much about your achievements. You can have a look at the press releases below. The articles seem like a replication of **your project schedules**.

To give you a “Well done” would be a bit watered down in this case. You guys have been incredible. If at any stage you have wondered why we were selected as the PMO of the year in 2018, I just want to remind you that what we delivered and will still be delivering in 2019, is not average.

We are delivering World Class Facilities with Minimal resources through Maximum Determination and Innovation.
